

Ulydor

PBX Door Access Control Systems

Ulydor Systems by Kalika

The Kalika door access control solution is now available pre-assembled. Choose one of the systems from the range that is most suitable for your needs. Or build a bespoke solution with, multiple buttons (up to 64), a keypad, RFID modules and cameras. Ulydor is flexible, cost effective and compatible with almost all telephone systems, requiring only a two-wire analogue extension. They are also extremely easy to install and use.

Ulydor is the perfect door access method for blocks of apartments, housing, offices or multi-tenant premises

where individual companies need their own unique entry solution.

We have five PBX enabled, pre-assembled systems with the following features to choose from:

- Day & Night modes
- DTMF or PC programmable
- Connect to an analogue extension
- Systems 1, 2 & 3 can operate without a power supply
- Robust Surface mounted weather resistant aluminium housing
